

American Access & Integration Systems Job Description

Position Title: Field Service Technician - Intrusion
Department: Div28 Installation
Position Location: Lenexa, KS & Phoenix, AZ
Reports to: Operations Manager Div 28

About Us

American Access Integration Systems designs, installs, and services integrated electronic security solutions for commercial and educational facilities across the nation. We provide seamless security solutions that eliminates physical keys and lets an individual's credentials provide access to the buildings where they live, work, and learn.

Field Service Technician - Intrusion

The Field Service Technician - Intrusion is responsible for installing, servicing and maintaining security, fire, video and access systems. Technicians will work with low voltage systems and devices and make repairs and programming changes. The employee will follow company standard operating procedures.

Job Description

We are looking for low voltage technicians with basic experience installing and programming intrusion and burglar alarm systems. At AAI we also perform installations of access control, video surveillance and intrusion detection systems. While experience is preferred with any or all of those types of systems, it is not necessary beyond a basic skill set with intrusion. American Access Integration Systems designs, installs, and services integrated electronic security solutions for commercial and educational facilities across the nation. We have multiple opportunities with extremely competitive pay and upward promotions for the right individuals.

Job Skills/Requirements

- One to three years of experience installing/servicing/trouble shooting electronic equipment preferred
- Life certification preferred
- Experience in reading blueprints and diagrams
- Ability to diagnose service issues and repair equipment
